**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Gan (6,469,889). Gan teaches a mounting apparatus assembly (Fig. 1) comprising: a data storage device (80); a supporting member (95; side walls) defining opposite two side walls with a space there between so as to allow the data storage device to be inserted there into in a front-to-back direction; a combination including one slide rail (12) and a corresponding grounding strip (14) associated therewith commonly mounted to one side of the data storage device corresponding to one of the side walls; the combination forming a deflectable latching section (at 46); and a handle (47) mounted to the combination (via attachment to the rail) and moveable relative thereto; wherein the data storage device is fixedly received in the space by engagement between the latching section and one of the side walls, while is allowed to be removed from the space in a direction opposite to the front-to-back direction by movement of the handle relative to the combination to inwardly deflect the latching section for disengaging the latching section from one of the side walls (when the handle is pushed in and the device is moved out of the supporting member, the grounding members inherently would move inwardly toward the rail to allow the rail to be removed

Art Unit: 3637

from the member). Furthermore, the sidewalls include recesses (recesses which include 98) to receive the combination/latching section.

***Allowable Subject Matter***

Claims 1-17 are allowed. (For 1 and 10, the prior art fails to teach a mounting apparatus comprising: a bracket with side walls having first openings therein and support plates corresponding to the openings and a pair of side rails supported on respective supporting plates and each including a main body with an arm, fastening section and stopper and a removable handle with a second opening into which the fastening section extends to engage with a respect first opening, the stopper limiting movement of the handle relative to the main body. Wherein, when the handles are pulled forward to ride over the fastening sections, the sections are released from the first openings.)

Claims 19 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet M. Wilkens whose telephone number is (571) 272-6869. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571) 272-6867. The fax
